📞 Whatsapp: (+63) 945 793 8546

🏠 Cebu City, Philippines

I'm a Chemical Engineer transitioning into both Data Analytics and SEO, bringing a strong foundation in analytical thinking, problem-solving, and process optimization. I have hands-on experience with data handling, reporting, and extracting insights, alongside practical SEO work in keyword research, on-page optimization, and content development. I'm comfortable using tools like Google Sheets for data analysis, WordPress and Divi for content implementation, and ClickUp for workflow management, while collaborating daily through Slack, Microsoft Teams, and Gmail. I focus on accuracy, organization, and turning data into actionable insights, while continuously improving my skills to deliver measurable results in both analytics and search performance.

🎓 EDUCATION

Bachelor of Science in Chemical Engineering

2015 - 2019

Mindanao State University - Iligan Institute of Technology

Diploma in Chemical Engineering Technology

2012 - 2015

Mindanao State University - Iligan Institute of Technology

🔧 WORK EXPERIENCE

ZENITH COLLECTIVE *SEO Assistant/Intern (July 2025 - December 2025)*

Key Responsibilities:

- Supported website optimization efforts by assisting with on-page SEO tasks, including optimizing title tags, meta descriptions, headers, URLs, and internal links.
- Conducted keyword research to identify relevant and high-potential search terms.
- Assisted in performing site audits and competitor analysis to identify content gaps and optimization opportunities.
- Contributed to off-page SEO initiatives such as backlink outreach and guest posting.

MANAGED WEBSITES: [LEVYLAW](#) | [GGHLAW](#)

DEPARTMENT OF SCIENCE AND TECHNOLOGY *Researcher (June 2024 - December 2025)*

Key Responsibilities:

- Collected and analyzed large sets of plant operational data to monitor performance, detect inefficiencies, and support process optimization initiatives.
- Developed and maintained structured datasets for inventory, production, and environmental monitoring.
- Coordinated with project partners to organize and facilitate monthly meetings, ensuring alignment on project goals, timelines, and deliverables.
- Produced comprehensive technical and regulatory reports using data visualization and structured analysis.

TAGANITO HPAL NICKEL CORPORATION *Process Engineer (December 2020 - December 2023)*

Key Responsibilities:

- Collected and analyzed operational data to identify trends, inefficiencies, and optimization opportunities.
- Prepared clear, concise technical reports for management, translating complex data into actionable insights and strategic recommendations.
- Developed and implemented an Excel VBA-based system to systematically record, monitor, and analyze chemical inventory data, improving data accuracy and traceability.
